## “A” Pattern competition 2016

Eleven competitors came for the Pattern competition the weather was sunny with a light breeze from the North East

The competitors were asked to perform 10 manoeuvres and land in the marked box, which was the width of the runway, to get 5 marks added to the final total.

The marks for the round, from the two judges were added together to give a final total, Pilots with B Certs had 10% and A Certs had 5% deducted from the final total. The winner would be the highest total.

Ray Beadle flying a new Fun Fly went first, The model was too twitchy to fly smoothly and made a poor score however he landed in the box to get the extra points.

Second was Keith Watts with his electric Acrowot but had trim problems and aborted early. Peter Turley, Tony Coombes, Ken Knox and Brian Rimmer also had problems and aborted during the flight.

Eamon Keating flew his Visionair was short of power at the end of the flight ,but still made the landing box. Next came James Eddington with his Electric Hype, he again ran out of power at the end but still made the landing box

Derek Honeysett flying his pattern model, had a good flight with large shapes and made the landing box, then came Nick Gates who flew a large Vertigo. He had a very good flight and also made the landing box.

David Hayward flew his I/C Trainer, David does not have an “A” certificates he is relatively new to the hobby and flew well in his first competition however he did not make the box.

So the final result, after adding the extra marks and deleting the handicaps, was a win for Nick Gates second for Eamon Keating and a third for Derek Honeysett .

Thanks to Tony Chant and Mick Blundell who did the marking for me and to all who came!

Cheers Ray Beadle .

This is what Aero modelling is all about in my opinion that fleeting glance and you are up there in the clouds, the picture of Colin's Hawker Tomtit circa 1929 is out of focus but I think lends to the reality KK

### Note to all Users of Porthole Farm

It is imperative that when entering and leaving the field **you must LOCK** the gate behind you irrespective of other people/vehicles still being there (i.e. Dog trainers) as the land owner has **INSISTED** that this be carried and is a fundamental clause in the use of the field.
